COMPONENT DESIGN

ASSEMBLY PROCESS

Step 1:
Gather three to five construction workers

x 3-5

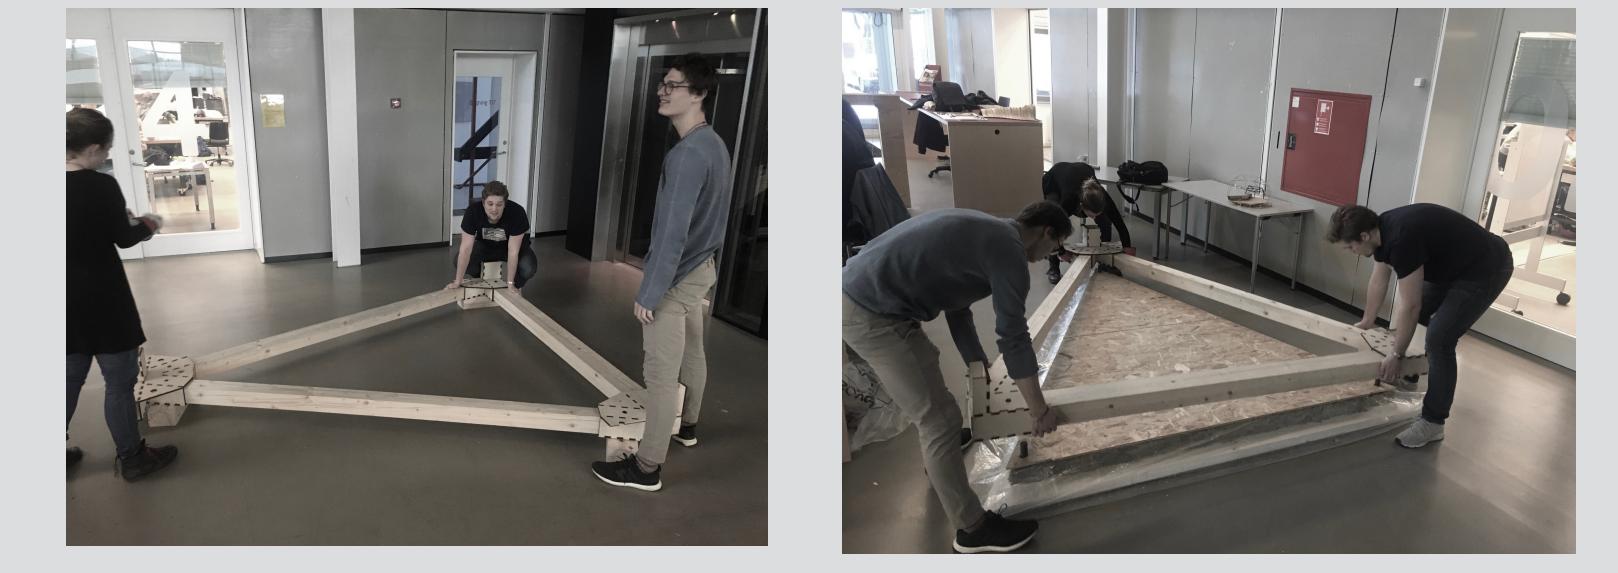

Step 2:
Put beams and joints on ground and make sure they are facing the right direction

Step 3:
Push the clicking-system on the beam and insert in the joint. Repeat for all beams.

Step 4:
Lift component and place on structure so the plastic pins penetrate the joint

Step 6:
Insert metal-pins to secure the facade element to the joint
